

Test Results | THERMORY® White Ash

Absorbency

Absorbency

TESTED

► Moisture content given in a set of specific temperature and relative humidity conditions and the resulting increase or decrease in moisture content in THERMORY® White Ash.

RESULTS

► The moisture content in comparison to standard kiln-dried woods is significantly reduced by thermal modification of THERMORY® White Ash.

► DECKING ► CLADDING ► PORCH FLOORING

w - moisture content measured by test, %

w_t - theoretical equilibrium moisture content, %

ρ_o - absolute density of KD wood, kg/m³

ρ_w - density on moisture level w , kg/m³

K_{pl} - swelling factor in board width %/% (growth in width per growth of moisture content in 1%)

K_{pp} - swelling factor in board thickness %/% (growth in width per growth of moisture content in 1%)
