For the best performance and protection from the elements, Russin can guide you on the right choices for your aesthetic.

Island Decking combines a luxury feel with a reasonable price, making it an ideal material choice for those who want a beautiful high-end deck but want to keep their pretty pennies. It's composed of 100% certified Malaysian hardwood and harvested from sustainably-managed forests. Island Decking has the same natural properties of mahogany, including a natural color palette ranging from browns to pinks and greys. It's also prized for its legendary tight-grained composition, providing desirable durability that lasts.

**COMPLEMENTARY PRODUCTS TO FINISH THE JOB**  
 Ask Your Russin Product Expert for More Information! Get the look of Island Decking throughout your space, or enhance any project, with these additional Island Decking products:

- Accent Boards
- Outdoor - Dimensional Lumber

## COMPLEMENT YOUR HARDWOOD DECKING WITH...

A RAILING SOLUTION THAT  
MATCHES YOUR AESTHETIC

### RUSSIN CAN PROVIDE A COMPLETE PACKAGE INCLUSIVE OF ALUMINUM, GLASS OR CABLE RAIL SOLUTIONS.

When you need a railing system to add both security and style to your deck, Russin can help. All of our hardwood decking lines offer accessories to create the rail of your dreams, or we can offset your hardwood deck with a railing in a complementary style. Aluminum and cable rail options are growing in popularity and the Deckorators ALX lines look great with all of our hardwood decking products. Want a clear view with clean sight lines? Invisirail systems provide a beautiful glass rail design with sleek lines and nothing to obscure your view. We can provide all necessary accessories including lighting systems and postcover options – we can even help you mix and match systems to create a custom look that meets your vision.

### INSTALLATION TIPS

Hardwood decking will not shrink appreciably in length after installation. It will, however, expand slightly in width, once exposed to the elements. We recommend a 1/4" space between deck boards side to side on 5/4 x 6 and 3/16" on 5/4 x 4. Butt boards tight end to end. If you are installing unfinished, the product will turn to a silvery gray color with time. We do recommend that you seal your decking to protect it against moisture damage.

We recommend that all 6 sides of the deck board are coated and make sure all cut ends are sealed to prevent against end checking. Decks should be a minimum of 18" off the ground and air below the deck should flow freely! Stainless steel screws recommended. Use one of our hidden clip systems, or use a minimum of three fasteners across the face of 5/4 x 6 and two across the face of 5/4 x 4. 5/4 x 4 & 6 can be used on either 16" or 24" on center joist spacing. If applying diagonally we suggest a minimum of 16" on center spacing. More detailed installation instructions are available upon request.
