Every Board is Manufactured and Primed at Russin Facilities

Because Quality Makes a Difference

TREATED, DEFECT FREE TRIM

Evolution Enhanced is a line of primed, finger-joint exterior and interior trim made of 100% defect free radiata pine. The substrate is treated prior to priming to provide protection from rot, insects and mold. Evolution Enhanced is produced exclusively at Russin-owned facilities, giving us complete control over every detail.

Evolution Enhanced was created as an all-around trim solution - it's easy to work with, extremely consistent, and incredibly easy to finish.

The finger-jointed composition means it's stable and less prone to warping, and it's three-coat primed and ready for finishing to match your style.

Russin employs the latest technology in our processes to greatly reduce the presence of grain raise, resulting in the smoothest, most enduring trim product available.

FINISH YOUR PROJECT IN STYLE WITH NO-FUSS EVOLUTION ENHANCED- TREATED, PRIMED AND READY FOR FINISHING.

PRODUCT AVAILABILITY & SPECIFICATION
